

1H23 Results

For the half-year ended 31 March 2023

11 May 2023

Disclaimer

This presentation includes both information that is historical in character and information that consists of forward looking statements. Forward looking statements are not based on historical facts, but are based on current expectations of future results or events. The forward looking statements are subject to risks, stakeholder engagement, uncertainties and assumptions which could cause actual results, timing, or events to differ materially from the expectations described in such forward looking statements. Those risks and uncertainties include factors and risks specific to the industry in which GrainCorp operates, any applicable legal requirements, as well as matters such as general economic conditions.

While GrainCorp believes that the expectations reflected in the forward looking statements in this presentation are reasonable, neither GrainCorp nor its directors or any other person named in the presentation can assure you that such expectations will prove to be correct or that implied results will be achieved. These forward looking statements do not constitute any representation as to future performance and should not be relied upon as financial advice of any nature. Any forward looking statement contained in this document is qualified by this cautionary statement.

Numbers throughout the presentation may not add up due to rounding.

Agenda

Speakers

Robert Spurway

Managing Director and CEO

Ian Morrison

Chief Financial Officer

Contents

- Safety
- 1H23 results
- Strategy update
- Balance sheet and capital management
- Outlook and conclusion
- Appendices

GrainCorp acknowledges Aboriginal and Torres Strait Islander peoples as the First Peoples of Australia and embraces the spirit of reconciliation, working towards the equality of outcomes and ensuring an equal voice.

Commitment to Zero Harm

The safety of our people is our highest priority

- Colleague fatally injured in NSW in April 2023
- Focus on initiatives to drive improvements in safety systems and processes
- Developments in 1H23:
 - High number of Safety, Health & Environment (SHE) engagements
 - Increase in corrective actions generated from Critical Risk Reviews
 - Improved management of corrective actions

Recordable injury frequency rate (RIFR)¹

Lost time injury frequency rate (LTIFR)²

Mahesh Golla
GrainCorp Foods, West Footscray, VIC

1. Number of recordable injuries per million hours worked. 1H23 is a rolling 12 months to 31 March 2023.

2. Number of lost time injuries per million hours worked. 1H23 is a rolling 12 months to 31 March 2023.

Outstanding 1H23 performance

Strong financial results and balance sheet

Outstanding 1H23 performance

- 1H23 EBITDA¹ of \$383m
- Growth in Processing volumes and margins

Improved earnings outlook

- FY23 EBITDA guidance upgraded to \$500-560 million²
- Average EBITDA 'through-the-cycle' raised to \$310m³

Strong balance sheet

- \$200m core cash
- UMG stake valued at \$121m⁴
- Working capital expected to unwind

Driving shareholder value

- FY23 interim dividend declared⁵: 24cps, fully franked
- Evaluating new oilseed crush plant

GrainCorp strongly positioned to invest in growth and deliver shareholder returns

1. EBITDA is a non-IFRS measure representing earnings before interest, tax, depreciation and amortisation
2. Previous guidance was \$470-530 million (announced 16 February 2023)
3. Average EBITDA through-the-cycle is an estimate based on a multi-year crop cycle incorporating both below-average and above-average crop years. The previous TTC EBITDA of \$240m (announced March 2021) represented a single year with average grain metrics and average market conditions. See slide 29 for more detail.
4. Retained UMG stake based on share price of \$4.75 at 31 March 2023
5. Comprises 14cps interim ordinary dividend + 10cps interim special dividend declared

1H23 highlights

Excellent all-round performance

EBITDA

\$383m

(1H22: \$427m)

NPAT¹

\$200m

(1H22: \$246m)

Return on invested capital (ROIC)²

22.7%

(1H22: 25.7%)

Total grain handled^{3,4}

34.8mmt

(1H22: 38.0mmt)

Oilseed crush volumes⁴

256kmt

(1H22: 232kmt)

Core cash⁵

\$200m

2H22: (\$177m core cash)

1. NPAT = Net Profit After Tax
2. ROIC is a non-IFRS measure and is defined as Group net profit after tax less interest expense (after tax) associated with core debt / average net debt (excluding commodity inventory funding) + average total equity
3. Composition of 'total grain handled' shown on Slide 12
4. mmt = million metric tonnes. kmt = thousand metric tonnes
5. Core cash / (debt) = net debt less commodity inventory

Commitment to environment and sustainability

ESG is fundamental to GrainCorp's long-term performance and sustainability

Our environment

- Commenced development of emissions reduction roadmaps for Scope 1, 2 and 3 emissions
- Sustainable Agriculture – engaging growers on nature, climate and sustainable agriculture through focus groups and pilot projects
- Secured recycling partner for grain bunker tarpaulins

Our people

- GrainCorp Community Foundation: supporting environmental and infrastructure projects, social services, wellbeing programs
- 375+ participants in frontline employee leadership program 'Licence to Lead'

Our integrity

- Submission of Reconciliation Action Plan (RAP) at the Innovate level
- Embedding palm and soy position statements
- Progressing sustainability strategy - working groups addressing material topics

Strategic priorities driving higher return on invested capital

 Our vision	Our vision is to lead sustainable and innovative agriculture through another century of growth.	
 Our purpose	Proudly connect with customers and rural communities to deliver value through innovation and expertise.	
 Strategic priorities	Strengthen the core	Targeted growth opportunities
<p>Lift returns </p> <p>Drive existing assets </p> <p>Leverage capabilities </p>	<p>Alternative Protein </p> <p>Digital and AgTech </p> <p>Animal Nutrition </p> <p>Grower services </p> <p>Agri-Energy </p>	

Evaluating new oilseed crush plant

Opportunity to build on GrainCorp's position as a leading supplier of renewable fuel feedstocks

- Assessing options for new oilseed crush capacity
- Creating the opportunity to:
 - build on GrainCorp's position as a leading Australian supplier of renewable fuel feedstocks
 - create additional local source of ongoing demand for Australian oilseeds
 - improve Australia's energy security

GrainCorp's existing integrated portfolio of feedstocks

Used Cooking Oil (UCO)

Leading Australian UCO up-cycler; over 22m litres upcycled per annum.

Canola oil

Australia's largest canola seed crusher, with 500kmt current capacity across two sites in VIC and WA.

Tallow

A leading Australasian supplier of tallow for use in renewable fuels and animal feed.

GrainCorp oilseed crush plant, Numurkah, Victoria

1H23 financial performance

1H23 financial performance

A strong result, following record high achieved in 1H22

\$m	1H23	1H22
Business segment EBITDA		
Agribusiness	254	376
Processing	103	70
Corporate (excluding UMG ¹)	(15)	(12)
UMG ²	41	(7)
Total EBITDA	383	427
Depreciation & Amortisation	(57)	(57)
Net Interest ³	(33)	(15)
Tax	(93)	(109)
NPAT	200	246

- See slides 12-14 for descriptions of business segment performance
- Increase in corporate costs due to investment in growth programs
- Increase in fair value of UMG investment² reflects share price appreciation during 1H23
- Increase in net interest primarily due to rise in interest rates on commodity inventory funding³

1. United Malt Group (ASX: UMG)

2. Comprises movement in UMG share price + dividends received. 1H23 comprises change in share price from \$3.13 at 30 Sep 2022 to \$4.75 at 31 Mar 2023. NB: on 28 March 2023, UMG announced it had received an indicative proposal from Malteries Soufflet to acquire all ordinary UMG shares on issue for \$5.00 in cash per share

3. The interest cost on commodity inventory is considered a cost of goods sold and is passed through to customers within the cost of the commodity

Agribusiness

Excellent all-round performance, leveraging GrainCorp's leading ECA footprint and capabilities

East Coast Australia (ECA)

- Positive cropping conditions supported ECA grain production of 31.4mmt in 2022-23
- Large carry-in of 4.9mmt supported total supply
- Strong supply chain margins, albeit lower than 1H22
- Higher costs arising from protracted, wet harvest
- 5-year extension of Pacific National rail contract in NSW and Victoria
- Result includes \$70.0 million payment⁶ (by GrainCorp) under Crop Production Contract (CPC) (HY22: \$70.0 million)
- Increase in bulk material volumes - improving utilisation of port assets

1. 'ECA production' represents the total ECA winter + ECA sorghum production, per the definition from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES). FY23 production of 31.4mmt is based on ABARES' March 2023 estimate for ECA winter (28.9mmt) and ECA sorghum (2.5mmt) production for the 2022/23 season

2. Receivals comprise total tonnes received up-country and direct-to-port

3. Exports comprise bulk and container exports of grain and oilseeds.

4. 'Total grain handled' comprises GrainCorp carry-in + receivals + imports + domestic outload + exports + GrainCorp carry-out

5. Bulk materials handled (or 'non-grain') comprises in-bound receivals of sand, cement, sugar, woodchips, fertiliser and other materials

6. 1H23 impact: -\$82m (comprising -\$70m payout, -\$6m annual premium and -\$6m fair value movement)

Agribusiness

\$m	1H23	1H22
Revenue	4,322	3,879
EBITDA	254	376
EBIT	211	335
Capex & investments	29	19

Key ECA metrics

mmt	1H23	1H22
ECA production ¹	31.4	33.9
Carry-in	4.9	4.3
Receivals ²	12.5	14.7
Total supply	17.4	19.0
Domestic outload	3.4	3.0
Exports ³	4.4	4.5
Carry-out	9.6	11.5
Total grain handled⁴	34.8	38.0
Contracted grain sales – ECA	3.3	3.7
Bulk materials handled ⁵	1.5	1.3

Agribusiness

Strong International and FFO contributions supporting Agribusiness result

International¹

- Strong result, benefiting from multi-origination strategy and execution from Western Australia
- Global demand for Australian grain remained strong, driven by record Australian production and uncertainty around northern hemisphere supply (due to weather and Ukraine-Russia conflict)
- Good supply chain execution from GrainsConnect Canada, however margins impacted by region's recovery from drought

Feeds, Fats & Oils (FFO)

- Feeds business performed well despite counter-cyclical nature of business to ECA cropping conditions, supported by larger national herd size and high demand for animal proteins
- Exceptional result for Fats and Oils (Agri-energy) business, driven by strong execution and demand for renewable fuel feedstocks, including used cooking oil (UCO) and tallow

Key International metrics

mmt	1H23	1H22
Contracted grain sales - ECA	3.3	3.7
Contracted grain sales - International	2.1	2.1
Contracted grain sales	5.4	5.8

Key FFO metrics

	1H23	1H22
FFO sales volumes (mmt)	0.4	0.4
Auscol collection volumes (kmt)	10.2	9.8

1. 'International' represents grain originated from all areas outside of East Coast Australia

Processing

Outstanding performance with improved efficiencies, higher volumes and stronger margins

Oilseeds

- Record half-year oilseed crush volumes with continued operational improvements being delivered
- Excellent crush margins, driven by:
 - Elevated domestic supply of canola seed – i.e. three consecutive years of record Australian canola production
 - Production challenges in key oilseed-growing regions outside of Australia
 - Ukraine conflict disrupting supply of oilseeds out of Black Sea
 - Strong demand for renewable fuel feedstocks

Foods

- Good volumes with focus on value-add product offerings
- Continued strong demand for refined vegetable oils, driven partially by Black Sea supply disruptions

Processing

\$m	1H23	1H22
Revenue	588	456
EBITDA	103	70
EBIT	91	57
Capex & investments	3	3

Oilseed crush volumes (kmt)

Foods sales volumes (kmt)

Balance sheet and capital management

Balance sheet strength

Strong cash generation to end half-year at \$200m core cash

Core cash / (debt) (\$m)

Debt and liquidity profile

Components	31 Mar 2023	30 Sep 2022	31 Mar 2022
Term debt	150	150	150
Inventory and working capital financing	1,584	713	2,158
Cash	(319)	(322)	(311)
Net debt	1,415	540	1,997
Commodity inventory	(1,615)	(717)	(2,126)
Core cash / (debt)¹	200	177	129
Core cash/(debt) gearing	14%	14%	10%
Retained UMG stake	(121) ²	(80)	(96)

Debt facilities - overview

Facility type (\$m)	Facility ³	31 Mar 2023 (utilised)	Expiry
Working capital	560	122	Nov 2023
Commodity inventory funding	1,964	1,462	Nov 2023
Term debt	150	150	Mar 2025
Total – all borrowings	2,674	1,734	

1. Refer to Appendix for a detailed breakdown of core cash / (debt) movements in 1H23

2. Retained UMG stake based on share price of \$4.75 at 31 March 2023

3. These represent facility limits as at 31 March 2023

Working capital movements

Working capital currently elevated - expected to unwind as cycle moderates

ECA grain production / GrainCorp exports (mmt)

- ECA grain production and GrainCorp export volumes during FY21-23 have been well above the 10-year average

GrainCorp Net Working Capital (NWC) (\$m)²

- NWC has been elevated due to short-term funding requirements for grain shipments and high commodity prices
- NWC expected to unwind as forward grain sales are physically executed, and as commodity prices and export activity normalise

1. Represents mid-point of estimate for FY23 exports (8.5-9.5mmt)

2. Net working capital includes trade and other receivables, inventories (excluding commodity inventory at fair value less costs to sell), mark-to-market assets and liabilities, trade and other payables, deferred revenue and employee related provisions.

Continued capital allocation discipline

Investing prudently in ECA network to support results during current cycle

Capex and investments (\$m)¹

■ Sustaining ■ Growth ■ Investments

- 1H23 sustaining capex above target due to ECA investments supporting short-term earnings (e.g. tarpaulins, mobile fleet)
- FY23 sustaining capex expected to be comparable to FY22
- Sustaining capex target increased to \$40-50m (from \$35-45m), with increased focus on sustainability initiatives such as emissions reduction and energy efficiency

Depreciation & Amortisation (D&A) (\$m)^{1,2}

■ D&A ■ AASB-16 depreciation

- FY23 D&A expected to be similar to FY22, before decreasing in line with capital investment
- High D&A relative to capex is supportive of strong future generation of cashflows

1. Excludes Australian Bulk Liquid Terminals
 2. New AASB-16 lease standard introduced in FY20

Delivering strong returns

Creating a consistent dividend profile through-the-cycle

Dividends (cents per share)

- Ordinary dividend
- Special dividend

- 1H23 interim dividend: total 24cps, fully franked
- Ordinary dividend reflects Board's confidence in through-the-cycle earnings
- \$50 million share buy-back completed in FY22
- Capital management will continue to be assessed against growth opportunities

Outlook and conclusion

FY23 outlook and guidance

Positive near-term and long-term outlook

FY23 guidance upgraded^{1,2}:

- EBITDA \$500-560m (from \$470-530m²)
- NPAT \$220-260m (from \$180-220m²)

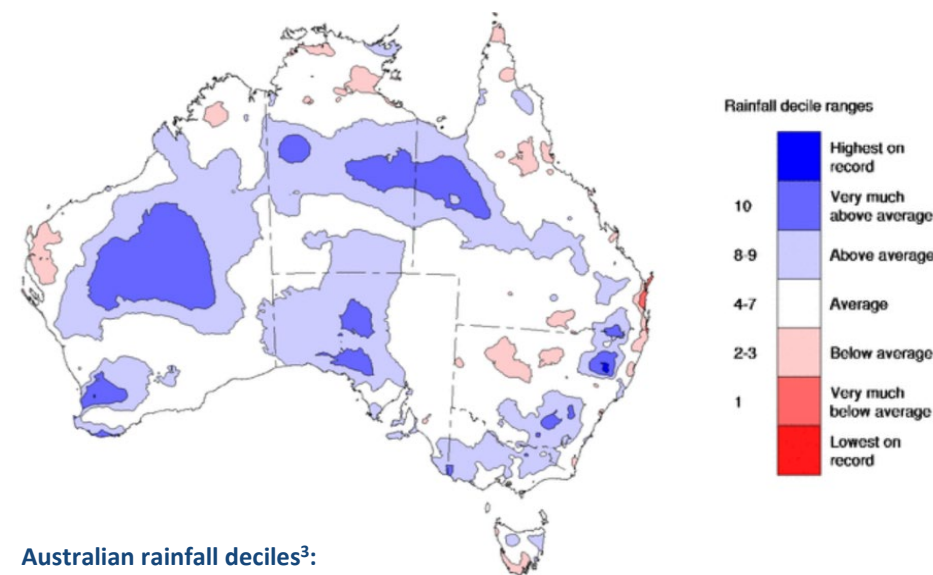

Outlook – near-term:

- Expect full export program for remainder of FY23
- Strong global demand for Australian grain and vegetable oils
- Good rainfall in most areas in lead-up to ECA planting

Outlook – longer-term:

- Food security remains a key priority for countries globally
- Rising demand for vegetable oils for food and renewable fuels
- Growth in ECA grain production as farming practices, technology improves

Good rainfall in most areas through March and April has supported ECA grower planting

Australian rainfall deciles³:
1 March – 30 April 2023

1. FY23 guidance incorporates a fair value increase in GrainCorp's stake in United Malt Group of \$31 million, which relates to the share price increase in UMG between 30-Sep-22 and 10-May-23. This compares to the previous guidance announced on 16-Feb-23, which incorporated a \$14 million fair value increase between 30-Sep-22 and 15-Feb-23.

2. FY23 guidance subject to: 2H grain receival and export volumes, supply chain margins, oilseed crush margins, and outlook for 2023/24 ECA crop.

3. Source: bom.gov.au . Base period 1900 – Apr 2023

Lifting average earnings through-the-cycle to \$310 million

Structural improvements and leverage to ECA crops drive higher average earnings

Average EBITDA through-the-cycle (\$m)

- GrainCorp’s average earnings through-the-cycle¹ has risen to ~\$310m due to:
 - Increase in oilseed crush volumes: 460kmt to 500kmt
 - Sustained increase in oilseed crush margins, driven by higher demand for oil for food and renewable fuels, and margins for renewable fuel feedstocks including UCO
 - Significant operating leverage demonstrated in large ECA crop years, together with cash flow support from Crop Production Contract in drought years
 - Increase in interest on commodity funding, reflected in higher net interest, passed through in cost of inventory
- See Slide 29 for further detail

Demonstrating significant operating leverage in large ECA crop years

1. Average EBITDA through-the-cycle is an estimate based on a multi-year crop cycle incorporating both below-average and above-average crop years. The previous TTC EBITDA of \$240m (announced March 2021) represented a single year with average grain metrics and average market conditions. See slide 29 for more detail.

Conclusion

Outstanding 1H23 performance

Strong balance sheet with significant flexibility

Progressing strategy – evaluating new oilseed crush plant

Upgrading FY23 EBITDA guidance from \$470-530m to \$500-560m

Lifting average earnings through the cycle from \$240m to \$310m

Delivering strong financial returns

Appendices

About GrainCorp

GrainCorp is a leading Australian agribusiness and processing company, with integrated operations across four continents and a proud history of delivering for customers for more than 100 years.

7

Ports across ECA

500kmt

Oilseed crush capacity[△]

>160

Receival sites throughout ECA

290kmt

Oil refining, bleaching and deodorising (RBD) capacity

12

Marketing offices globally

4

Grain elevators and one port in western Canada*[△]

* Through GrainsConnect Canada, a 50-50 JV between GrainCorp and Zen-Noh.

^ Fraser Grain Terminal owned through 50-50 JV between GrainsConnect Canada and Parish & Heimbecker

△ Oilseed crush capacity has increased as a result of sustained operational improvements to Numurkah facility

How we operate

We partner with growers to maximise the value of their crops, connecting them to domestic and global marketplaces through our end-to-end supply chain and infrastructure assets. We develop innovative solutions to create high quality and sustainable products across the food, feed and industrial sectors.

International

- Global network of offices, originating grain, pulses and oilseeds from different regions.
- Delivering to 350+ customers in 50+ countries.
- Includes GrainsConnect Canada joint venture and Saxon Agriculture

East Coast Australia (ECA)

- Largest grain storage and handling network on ECA.
- >160 regional receival sites and seven bulk ports, connected by road and rail infrastructure.
- Import/export of other bulk materials, e.g. cement, woodchips and fertiliser.

Oilseeds

- Leading oilseed crusher/refiner in Australia.
- Provides components for cooking oil, spreads and shortening, prepared foods, meal for dairy, poultry and livestock, cosmetics and lubricants, fuels and other industrial applications.

Foods

- Leading refiner of edible fats and oils in Australia.
- Supplier of ingredients for infant formula, bakery and large-scale food manufacturing industries.

Feeds, Fats & Oils

- Procurement, shipping, accreditation and value-added supply of tallow, vegetable oils and UCO, for delivery to food, feed, and renewable fuel customers.
- Manufacturer of feed solutions to meet nutritional needs and improve herd productivity.

Investment proposition

Attractive returns underpinned by outstanding execution and positive long-term fundamentals

Positive long-term fundamentals – rising global demand for food

Strategically located, well invested assets – significant replacement cost

Attractive growth opportunities, each with strong sustainability angle

Strong balance sheet – net core cash with working capital to unwind as conditions normalise

Exceptional shareholder returns

Strategy aligned to macro trends

Population growth / changing demographics

- Multi-origin strategy
- Leading position in ECA
- Australian and west coast Canadian proximity to Asian markets a competitive advantage

Decarbonisation and sustainability

- Sustainability and innovation embedded in our business and strategy
- Partnering with start-ups and growers, developing solutions to environmental challenges

Disrupted global supply chains

- Resilient, end-to-end supply chains
- Leading assets and capabilities
- Strong global customer network

Technology/digital acceleration

- Progressing digital capability through *CropConnect* platform, advanced analytics
- Supporting industry innovation and technology uptake through *GrainCorp Ventures*

GrainCorp
context

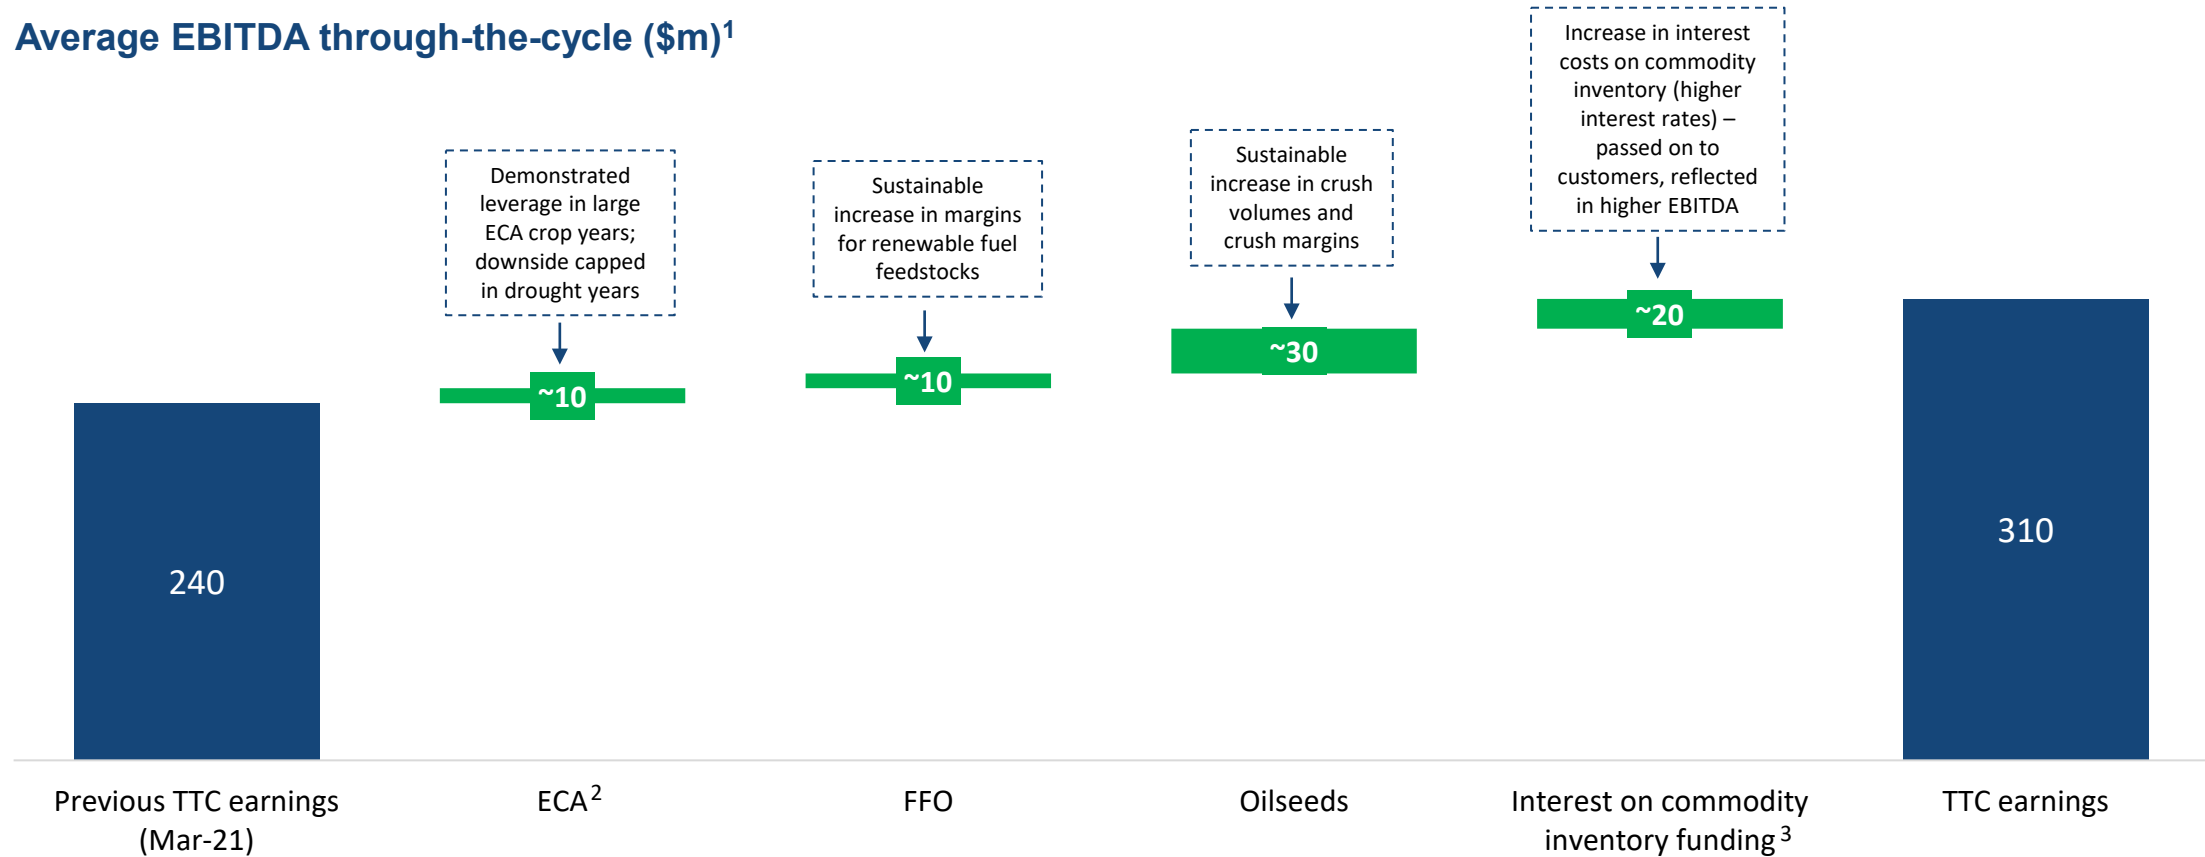

GrainCorp strongly positioned as Food and Agricultural industries evolve

Lifting average earnings through-the-cycle to \$310 million

Structural improvements and leverage to ECA crops drive higher average earnings

Average EBITDA through-the-cycle (\$m)¹

1. Average EBITDA through-the-cycle is an estimate based on a multi-year crop cycle incorporating both below-average and above-average crop years. The previous TTC EBITDA of \$240m (announced March 2021) represented a single year with average grain metrics and average market conditions.
2. Assumes annual ECA grain production (total ECA winter + ECA sorghum production) of 22-23mmt.
3. Assumes annual net interest cost related to commodity inventory of ~\$35 million

Significant operating leverage in large ECA crop years

Underlying EBITDA (\$m)¹

ECA production (mmt) ⁴	12.6	32.0	33.9	31.4
Tonnes handled (mmt) ⁵	14.2	34.4	41.1	37.7 ⁶

- GrainCorp has significant operating leverage in large ECA crop years, as demonstrated in FY21-23
- Operating initiatives and the Crop Production Contract have been effective at supporting earnings in small ECA crop years, as demonstrated in FY20, a severe drought year
- Sustained improvements to oilseeds volumes and margins, combined with ECA operating leverage, is driving average earnings of \$310 million through the cycle.

1. FY20-23 represents period post demerger of malt business and introduction of Crop Production Contract
 2. Includes proforma adjustment – removal of earnings from Australian Bulk Liquid Terminals
 3. FY23 EBITDA of \$530m represents the mid-point of FY23 guidance of \$500-560m
 4. ECA production represents total ECA winter + ECA sorghum production (source: ABARES)
 5. 'Tonnes handled' comprises GrainCorp carry-in + receivals + imports + domestic outload + exports + GrainCorp carry-out
 6. FY23 tonnes handled (37.7mmt) represents the mid-point of the guidance range announced on 16 February 2023 and re-confirmed on 11 May 2023

Earnings bridge: 1H22 to 1H23

1. CPC: 1H23 impact -\$82m (comprising -\$70m payout, -\$6m annual premium and -\$6m fair value movement). 1H22 impact -\$91m (comprising -\$70m payout, -\$6m annual premium and -\$15m fair value movement).
 2. UMG: 1H23 impact +\$41m. 1H22 impact -\$7m.

ECA tonnes handled

Total grain handled has a high correlation to ECA contribution margin

mmt	FY17	FY18	FY19	FY20	FY21	FY22	FY23e
ABARES – total ECA winter + sorghum production¹	29.2	18.0	9.7	12.6	32.0	33.9	31.4
Carry-in	1.7	3.3	2.3	1.5	0.7	4.3	4.9
Receivals ²	15.0	6.8	3.1	4.2	16.5	16.3	13.5 – 14.5
Imports (trans-shipments)	0.0	0.5	2.3	1.4	0.0	0.0	0.0
Domestic outload	6.2	5.6	5.8	5.1	5.0	6.4	5.5 – 6.5
Exports ³	7.2	2.7	0.3	1.3	7.9	9.2	8.5 – 9.5
Carry-out	3.3	2.3	1.5	0.7	4.3	4.9	3.5 – 4.0
Total grain handled⁴	33.4	21.2	15.3	14.2	34.4	41.1	35.9 – 39.4
Bulk materials (non-grain) handled ⁵	2.8	2.9	2.9	2.1	2.7	2.5	n/a

1. ECA production represents the total ECA winter + ECA sorghum production, per the definition from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES). FY23 production of 31.4mmt is based on ABARES' March 2023 estimate for ECA winter (28.9mmt) and ECA sorghum (2.5mmt) production for the 2022/23 season.

2. Receivals comprise total tonnes received up-country and direct-to-port.

3. Exports comprise bulk and container exports of grain and oilseeds.

4. 'Total grain handled' comprises GrainCorp carry-in + receivals + imports + domestic outload + exports + GrainCorp carry-out.

5. Bulk materials (non-grain) comprises inbound receivals of sand, cement, sugar, woodchips, fertiliser and other materials

Crop Production Contract

Smoothing GrainCorp's cash flows through the cycle

- 10-year contract (started FY20) with White Rock Insurance
- Production payments based on ABARES' "total ECA winter crop production"² estimate, disclosed in quarterly *Australian Crop Report*
- Maximum annual production payments (excluding \$6m annual premium):
 - GrainCorp payment \$70m
 - GrainCorp receipt \$80m
- Aggregate net limit \$270m over the length of the contract
- Production payment schedule:
 - February crop report: determines initial production payment
 - March: 90% of production payment is made/received
 - June crop report: determines final production payment amount
 - August: balance of production payment is made/received – with 'true-up' based on June update

Crop Production Contract – production payment profile¹

1. CPC payment profile includes the annual premium of ~\$6m.
 2. 'Total ECA winter crop production' = ABARES' winter crop production for the Australian states of Queensland, New South Wales and Victoria for all commodities.
 3. FY23F (Forecast) based on March 2023 ABARES estimate of 2022/23 ECA winter harvest.

Cash flow

(\$m)	31 Mar 2023	31 Mar 2022
Statutory EBITDA	383	427
Net Interest	(33)	(15)
Income taxes paid	(142)	(18)
Changes in working capital and other related items	(59)	(181)
Net operating cash flow excl inventory funding & commodity inventory	149	211
Proceeds for bank loans – inventory funding	836	1,286
Commodities inventory	(897)	(1,527)
Net cashflows from operating activities	87	(30)
Capital expenditure and investments	(41)	(26)
Proceeds from asset sales	-	1
Loans to related parties & other payments/receipts	-	(21)
Net cashflows from investing activities	(41)	(46)
Net borrowings	39	301
Dividends paid	(67)	(23)
Principal elements of lease payments	(21)	(18)
Other payments/receipts	(1)	-
Net cashflows from financing activities	(50)	260
Net increase in cash and cash equivalents	(3)	184

Core (debt)/cash bridge: FY22 – HY23

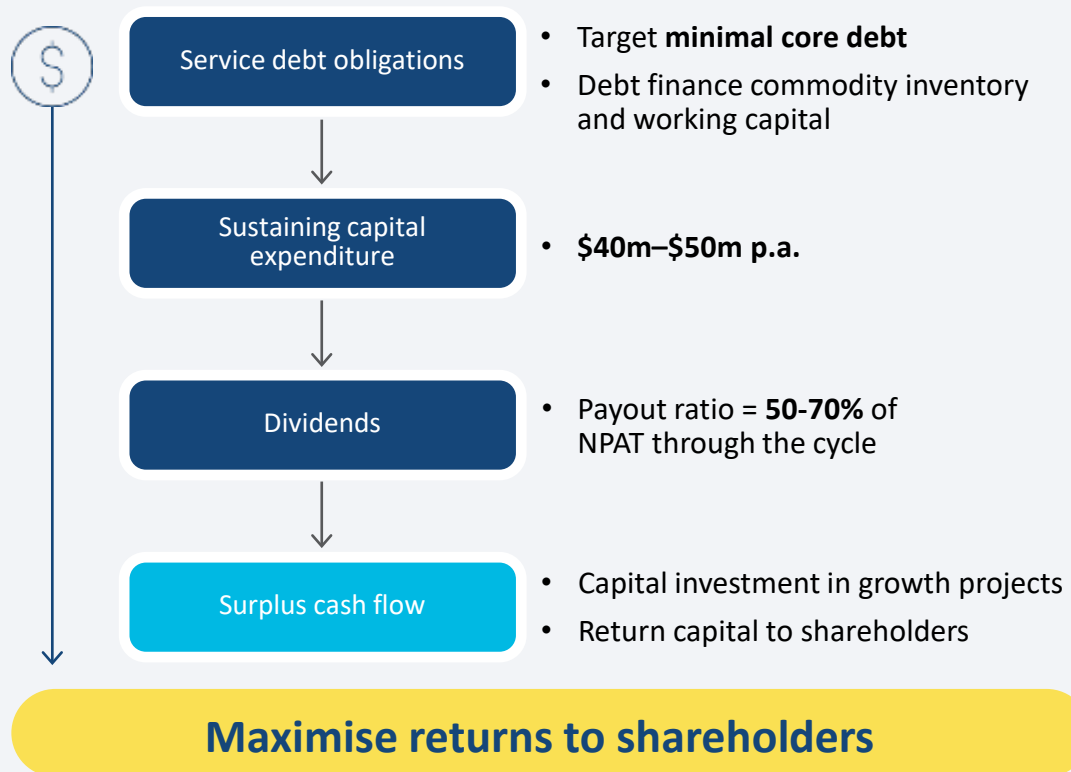

- Core cash position increased from \$177m at 30 Sep 2022 to \$200m at 31 Mar 2023
- Harvest related inventory procurement trade payable facility expected to unwind in the second half of FY23
- Harvest related increase in GST receivable on commodity inventory will unwind in the second half of FY23 as commodity inventory reduces
- Mark-to-market asset reflective of strong unrealised gains in the year
- Interest and tax includes final FY22 tax payment

¹ Comprises 14cps FY22 ordinary dividend and 16cps special dividend

² Includes UMG investment revaluation, net profit/loss on sale of fixed assets, profit/loss on associates (GCC)

Capital management framework

Glossary

Term	Definition
AASB	Australian Accounting Standards Board
ABARES	Australian Bureau of Agricultural and Resource Economics
CAGR	Compound Annual Growth Rate
Carry-in	Grain inventory at beginning of period (1 October)
Carry-out	Grain inventory at end of period (30 September)
Core cash / (debt)	Net debt less commodity inventory
CPC	Crop Production Contract
CSIRO	The Commonwealth Scientific and Industrial Research Organisation
Demerger	The demerger of the Malt business effective 23 March 2020
