### C. GrainCorp - Port Kembla water monitoring data summary: September 2023

The concentration of each pollutant specified below has been determined using the required sampling method, units of measure and sample frequency specified in the EPL. Water parameters and water samples are collected by suitably qualified staff and, where required, water samples are analysed at a NATA accredited laboratory.

**Monitoring frequency:** Single sample each day during any discharge (i.e. daily)

**Number of water release events during month:** 1

**Monitoring Point Location:** Point 1
